PROFESSIONAL SUMMARY

Full Stack Developer with 3+ years of professional experience designing and implementing secure enterprise web applications, e-governance systems, and high-concurrency data platforms. Adept at building robust digital architectures from scratch, transitioning traditional manual workflows into highly performant online solutions. Extensive expertise in engineering multi-tenant security layers (RBAC), complex transactional flows, and optimized data pipelines that achieved up to 70% reduction in application latency. Recognized for combining technical depth in modern JavaScript/PHP ecosystems with a strong user-centric approach to deliver resilient and scalable features.

TECHNICAL SKILLS

- **Backend Development:** Node.js, Express.js, Laravel 12 (PHP 8.3), RESTful APIs Design, Microservices Architecture
- **Frontend Engineering:** JavaScript (ES6+), TypeScript, Vue.js, React.js, Next.js (App Router), Tailwind CSS, State Management
- **Databases & Caching:** PostgreSQL (Drizzle ORM), MongoDB, MySQL, Redis (Aggregation Pipelines, Indexing, Caching)
- **Security & Crypto:** PKI Cryptography (PKCS#7, SHA-256), AES Encryption, JWT, Multi-tenant RBAC, Single Sign-On (SSO)
- **Cloud & Infrastructure:** AWS (EC2, S3, Lambda), Vercel, Docker, CI/CD Pipelines, PM2, Git/GitHub, Linux Runtime

PROFESSIONAL EXPERIENCE

Full Stack Developer | Prakhar Software Solutions Pvt. Ltd.

Mar 2023 – Present

1. Digital Labour Compliance & Automation Portal

Enterprise e-Governance SaaS-style platform built to automate business registrations, licensing, and compliance matrices.

- Owned the full development lifecycle of interactive, multi-step digital workflows from requirements gathering to final deployment, replacing dense manual paperwork.
- Integrated SBIePay Payment Gateway & Cyber Treasury module to automate real-time statutory fee calculations and financial transaction reconciliation.
- Implemented Hardware PKI DSC Signing Suite supporting USB tokens (Watchdata ProxKey) to cryptographically apply signatures onto certificates with secure public QR verification.

2. National Career Service (NCS) Gateway & Automation Bridge

A robust integration bridge linking local enterprise ecosystems with central government database networks.

- Designed secure Outgoing and Callback Partner Single Sign-On (SSO) architectures utilizing HMAC-SHA256 tokens for verified payload transfer.
- Automated continuous background data integration pipelines to sync enterprise profiles, implementing a faceted Redis-cached filtering system that slashed external API latency by 40%.

3. Department Main Automation Portal (labourdnhdd.in)

Central Single-Window Resource platform serving as the primary automated gateway for the entire department.

- Built core portal framework with a custom Content Management System (CMS) to seamlessly streamline public and enterprise access to live announcements, gazettes, and tenders.

4. BOCW & Cess Management System

Localized cloud management platform customized to handle complex construction project tracking and automated tax assessments.

- Designed a simplified 4-step layout submission workflow managed via unified dashboards secured by rigorous multi-tenant Role-Based Access Controls (RBAC) and client-side encryption.

5. BOCW Digital Labour Chowk (Mobile App Backend)

Location-based marketplace mobile application connecting contractors with on-demand local workers.

- Engineered a high-concurrency Node.js/MongoDB backend with built-in SMS OTP verification and real-time GPS/Firebase location mapping for instant discovery.
- Monitored performance metrics to optimize API responses, enabling seamless real-time push messaging and data flow under high traffic load.

6. e-Shram Department Microsite

Dedicated service-access platform built to support unorganized workers.

- Developed clean, component-based user interfaces for localized scheme discovery and locator tools backed by a custom CMS framework.

MERN Stack Developer (Intern) | Script India, Vapi Jan 2022 – Jun 2022

- Developed modular REST APIs with Express.js and MongoDB, achieving a 25% application response time improvement through deep query tuning, database indexing, and comprehensive unit testing.

CORE PRODUCTION PROJECTS

Local-First Collaborative Document Editor | *Next.js, TypeScript, PostgreSQL, Drizzle ORM, Gemini AI, SSE, IndexedDB* (2025)

- Engineered a Notion-style, offline-first collaborative editor writing instantly to IndexedDB with background data batching sync to reduce network overhead.
- Built a deterministic diff3Merge conflict resolution engine, fractional indexing, and context-aware Gemini AI side-chat autocomplete capabilities for enhanced user experience.

EDUCATION & LANGUAGES

- **Master of Computer Applications (MCA)** | Veer Narmad South Gujarat University (2020 – 2022)
- **Languages Known:** English (Professional), Tamil (Native), Hindi (Conversational), Gujarati (Conversational)
